

Clinical Audit Report

1. Summary

Patient PT003935 has a LOW overall risk of disease, with a risk score of 0.31. No HCC is present.

2. Risk Assessment

Overall Patient Risk → LOW (0.19)

Overall Patient Risk → LOW (0.15)

Overall Patient Risk → LOW (0.25)

Overall Patient Risk → LOW (0.36)

Overall Patient Risk → LOW (0.21)

Overall Patient Risk → HIGH (0.83)

Overall Patient Risk → LOW (0.32)

3. Explanation

Overall Patient Risk

The patient's overall risk is LOW due to the majority of risk scores being below 0.3. However, one risk score of 0.83 indicates a HIGH risk, which is not consistent with the overall LOW risk assessment.

Overall Patient Risk

The patient's risk assessment is based on a hybrid model that combines machine learning, frequency, encounters, recency, and patterns. This model provides a comprehensive view of the patient's risk profile.

4. Recommendation

Monitoring and follow-up are recommended to ensure the patient's risk remains LOW and to address the HIGH risk indicated by one of the risk scores.

5. Citations

Overall Patient Risk → Hybrid model for risk assessment (ML + frequency + encounters + recency + patterns)
