

Clinical Audit Report

1. Summary

Based on the analysis, HCC is PRESENT with a HIGH risk level. This indicates a high concern for the patient's overall condition, warranting close monitoring and follow-up.

2. Risk Assessment

Overall Patient Risk → HIGH (43.38659472928665)

3. Explanation

Overall Patient Risk

The patient's risk score is high due to the analysis of their history and encounter patterns. This suggests that the patient's condition has been a concern over time, with repeated visits indicating a need for ongoing monitoring. The pattern of visits suggests a potential underlying issue that requires attention.

4. Recommendation

We recommend close monitoring of the patient's condition, with regular follow-up appointments to assess the risk level. Additionally, a risk reassessment should be conducted to determine the effectiveness of the current treatment plan. Furthermore, the patient's history and encounter patterns should be reviewed to identify any potential underlying issues that may be contributing to the high risk level.
